

Yahia Alghanam

Data & Analytics Engineer — 3+ Years Building ETL Pipelines, SQL Data Models & BI Dashboards

Email: yahiaelghanam99@gmail.com | LinkedIn: <https://linkedin.com/in/yahia-alghanam> | GitHub: <https://github.com/yahiaalghanam>

Portfolio: <https://yahia-alghanam.vercel.app/> | Cairo, Egypt | +201064623142 | Open to relocation, remote and hybrid roles

SUMMARY

Results-driven Data & Analytics Engineer with 3+ years designing end-to-end ETL pipelines, relational data models, and KPI dashboards that turn raw datasets into actionable business intelligence. Built production-ready solutions using SQL Server, Python (Pandas, Scikit-learn), Power BI, and Medallion Architecture across market intelligence, sales analytics, and AI training data domains. IBM-certified data analyst with additional specializations in Deep Learning and NLP (DeepLearning.AI). Adept at bridging the gap between engineering and business stakeholders — translating complex data into clear, decision-ready insights.

TECHNICAL SKILLS

- **Programming & Databases:** Python (Pandas, NumPy, Matplotlib, Scikit-learn) · SQL (SQL Server, MySQL, PostgreSQL)
 - **Data Engineering:** ETL Pipelines · Data Modeling · Medallion Architecture · Web Scraping · Data Processing & Transformation · Conceptual knowledge of AWS, Databricks, dbt, Spark and Apache Airflow
 - **Data Analysis:** Data Cleaning & Transformation · Exploratory Data Analysis (EDA) · Statistical Analysis · Feature Engineering · Data Validation
 - **Visualization & Reporting:** Power BI · DAX · Excel (Pivot Tables, Advanced Formulas, Power Query) · Dashboard Development
 - **Machine Learning:** Supervised Learning · Model Training & Evaluation · Pipeline Orchestration
 - **Tools & Platforms:** Git & GitHub · Jupyter Notebook · Google Colab
-

EXPERIENCE

Warehouse & Logistics Supervisor (Data & Reporting Focus)

Future of Egypt for Sustainable Development — Cairo, Egypt | Jan 2025 – Mar 2026

- Managed and validated 5,000+ inventory records across warehouse operations, reducing data discrepancies by implementing standardized entry protocols.
- Designed and automated weekly operational reports tracking inventory movement, stock turnover, and KPIs — cutting manual reporting time by ~40%.
- Standardized documentation workflows across 3 warehouse units, improving data traceability and audit-readiness for monthly reporting cycles.

AI Model Trainer & Data Reviewer

Scale AI — Remote | May 2023 – Jan 2025

- Reviewed and quality-assured 10,000+ structured data samples used in LLM and ML model training pipelines, maintaining >98% annotation accuracy standards.
 - Ensured logical consistency, data quality, and accuracy across complex reasoning datasets.
 - Collaborated asynchronously with international annotation teams across 5+ time zones to uphold data quality standards for enterprise AI training pipelines.
-

PROJECTS

E-Commerce Data Warehouse & Analytics Platform — SQL Server, Power BI — [GITHUB](#)

- Architected a full star-schema data warehouse in SQL Server, consolidating sales, inventory, and customer data from 3+ source tables into a unified analytical layer.

- Engineered T-SQL ETL pipelines to clean, transform, and load transactional records — reducing data prep time for reporting by an estimated 60%.
- Built a 3-page Power BI dashboard tracking revenue trends, product performance, and customer segments — delivering KPI visibility across sales and operations.

Tools: SQL Server · T-SQL · Star Schema · ETL · Power BI · DAX · Data Modeling

Global Market Intelligence Indicators System — SQL Server, Power BI, Python — [GITHUB](#)

- Implemented Medallion Architecture (Bronze → Silver → Gold) in SQL Server to ingest, clean, and model multi-source market data covering Gold, USD, EUR, and SAR across multi-year historical ranges.
- Engineered 8+ T-SQL stored procedures to compute volatility metrics, inflation indicators, and currency movement signals — powering real-time macroeconomic trend analysis in the reporting layer.
- Optimized SQL query execution and data model design, cutting dashboard refresh time and enabling interactive drill-down across 5+ analytical report pages in Power BI.

Tools: SQL Server · T-SQL · Medallion Architecture · Power BI · DAX · Power Query · Python

Restaurant Sales Dashboard — Power BI, SQL, Excel — [GITHUB](#)

- Cleaned and transformed 1,000+ transaction records using SQL and Excel (Power Query, pivot tables), resolving data inconsistencies before loading into the reporting layer.
- Built a dynamic 2-page Power BI dashboard surfacing revenue trends, top-10 product rankings, and customer purchase behavior — delivering insights to support menu and pricing decisions.
- Defined DAX measures for rolling revenue, basket size, and category contribution, enabling flexible time-period comparisons across the dashboard.

Tools: Power BI · DAX · SQL · Excel · Power Query · Pivot Tables

Egyptian Tech Job Market Pipeline — Python, SQL, Web Scraping — [GITHUB](#)

- Built an automated web scraping pipeline in Python to collect and structure 500+ job postings from WUZZUF, Egypt's largest job platform, on a recurring basis.
- Stored and normalized extracted data in a relational SQL database schema, enabling querying by role, seniority, location, and required skills.
- Analyzed hiring trends across the Egyptian tech industry — identifying the top 10 most in-demand technical skills and salary bands by role category.

Tools: Python · BeautifulSoup · Requests · SQL · Pandas · Data Cleaning · EDA

EDUCATION

Bachelor of Computer Science & Information Technology | Minia University — Egypt

Major: Data Science & Information Systems Technology · Graduated: June 2024

CERTIFICATIONS & TRAINING

- Data Analysis Professional Certificate (9 Courses) — Coursera (IBM), 2024
- Natural Language Processing Specialization — DeepLearning.AI, 2023
- Deep Learning Specialization — DeepLearning.AI, 2023

Data Analysis Training — Information Technology Institute (ITI), 2024

- Covered data analysis, SQL, Excel, Power BI, dashboarding, and data visualization for business insights.

Artificial Intelligence Training — Information Technology Institute (ITI), 2023

- Focused on machine learning fundamentals, data preprocessing, model evaluation, and AI-driven analytical solutions.

Additional certifications are available upon request.

LANGUAGES

Arabic — Native speaker — **English** — Professional working proficiency (B2+)
